### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Specification*

1. The disclosure is objected to because of the following informalities: On page 1, before line 1, reference should be made to the provisional application (including serial number and filing date) and, preferably, to the PCT application as well.

Appropriate correction is required.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 24-37 are rejected under 35 U.S.C. 102(b) as being anticipated by Fan et al (U.S. Patent 5,474,719).

Fan et al (see the entire document, in particular, col. 28, line 8 to col. 29, line 49) teach a process of making three-dimensional objects by depositing solidifiable material onto a base as claimed, including the step of providing as the solidifiable material an alkali-soluble thermoplastic comprising a base polymer containing a carboxylic acid, and a plasticizer. Fan et al also teach a three-dimensional object comprised of an alkali-soluble thermoplastic material comprising a base polymer containing a carboxylic acid, and a plasticizer.

Art Unit: 1732

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

6. Claims 1-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Pomerantz et al (U.S. Patent 4,961,154) in combination with Fan et al (U.S. Patent 5,474,719).

Pomerantz et al (see the entire document, in particular, col. 12, line 27 to col. 14, line 2) teach a process of making a three-dimensional object as set forth in the instant claims, including providing a support structure for the three-dimensional

Art Unit: 1732

object, except that Pomerantz et al do not specifically teach the claimed support structure material, which is taught by Fan et al (see the entire document, in particular, col. 28, line 8 to col. 29, line 49) and such would have been obvious to one of ordinary skill in the art at the time the invention was made in the process of Pomerantz et al in view of Fan et al principally in order to provide a support structure having desired strength and rigidity.

### **Conclusion**

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Leo B. Tentoni whose telephone number is (571) 272-1209. The examiner can normally be reached on Monday - Friday (6:30 A.M. - 3:00 P.M.).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael P. Colaianni can be reached on (571) 272-1196. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
